## Graffiti Protection

### P101 Anti-graffiti Coating

P101 is a two pack, clear polyurethane coating which provides a highly graffiti-resistant finish.

This coating has good chemical resistance making it easy to clean and durable. Will not fade or yellow when exposed to high levels of Ultra Violet light, or support the growth of fungus.

Dries to a clear, gloss finish. Is particularly suitable for outdoor use but can also be used indoors.

P101 is suitable for many surfaces, but is not for use over conventional solvent based paints. P101 Brushwash/Thinners also available.

### WB101 Anti-graffiti Coating

WB101 is a two pack, water based polyurethane coating which acts as a sealer (reducing absorbency), allowing the removal of graffiti with solvent based products (see Graffiti Removers) and easy cleaning.

Being water based, this coating is low odour - sometimes important within indoor environments e.g. hospitals, schools and other public buildings.

**Anti-graffiti Kit also available.**

An easy, no fuss way to get all you need to create your graffiti resistant surface. Kit contains: WB101 2.5L 2 pack unit, paint brush, mixer paddle, gloves and instructions.

**Water  
Based**

The Safety and Security range is specially designed to offer a variety of easy to use problem solving products.

Coo-Var have over 100 years experience manufacturing specialist paints, including a range of anti-graffiti, anti-climb and anti-slip coatings.

This brochure takes you through Coo-Var's range of safety and security products, which

### GP101 Graffiti & Flyposting Protection System

This single pack system is a clear coating which offers long term protection against both graffiti and flyposters.

**CLEAN OFF  
GRAFFITI  
USING ONLY  
WATER**

- Fast drying – apply two coats in the same day
- Can be applied to rough or smooth surfaces
- Flyposters do not stick properly and just peel off
- Little 'ghosting' remains
- Save money - no need to buy solvents PLUS in-house cleaners can wash off graffiti using only water

### GP101 Sealer Coat

The Sealer Coat is recommended before GP101 Graffiti Protection System is applied on porous surfaces.

A transparent sealer which offers excellent water and mildew resistance on porous surfaces, is acrylic and free of volatile organic solvents. This results in it being low odour, non flammable and low toxicity.

Can also be used to minimise the darkening of sandstone and other natural stone products.

- **Liquid Aerosol** – tough on graffiti
- **Wipes** – for easy removal of small amounts of graffiti

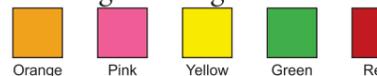

NOTE: Not for use with GP101

applications they are suitable for, their benefits and their technical information (back page).

Not sure which to use for your specific job? At any point in your decision or even after the coating is applied, you can call Coo-Var Technical Services to get advice and to answer any questions you may have – 01482 328053.

### Glocote Fluorescent Paint

High visibility paint which helps draw attention/ identify hazards or safety equipment such as fire extinguishers, skips and exits. For use in daylight or under lights at night.

### Glocote Foundation

Use under Glocote Paint to give a white base.

### Glocote Protective

A clear coating ideal to cover exterior use of Glocote paint to protect from weathering/extreme wear.

### Luminous Paint

This coating glows in the dark for a limited time when lights fail. Ideal for use around exits, edges of steps. Especially useful in buildings with large amounts of people.

### Luminous Foundation Base

Use under Luminous Paint to give a white base.

### Luminous Clear Protective

A clear coating for use over Luminous paint to protect from weathering/extreme wear.

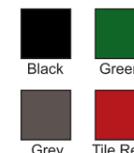

**Water Based**

NOTE: Always read the instructions as well as health & safety information before applying any coating.

### Vandalene Anti-climb Paint

A thick, non-drying product of a sticky nature. Designed to create a slippery surface so that intruders cannot get a grip and will become coated. Ideal for use above head height on gutters, pipes, walls, roofs, window sills etc.

PREVENT ACCIDENTAL DAMAGE - Warning signs available.

### SUREGRIP® Suregrip Anti-slip Safety Floor Paint

**The  
SIMPLE  
EFFECTIVE  
Solution**

Suitable for interior & exterior use on ramps, walkways, stairwells, around machinery and most areas where slip resistance is required. Suitable for foot and light truck traffic on wood, metal, masonry, concrete, brick and GRP. Available in 8 colours.

**HELP PREVENT ACCIDENTS**

### Line Marking Aerosols & Stencils

Line Marking Aerosols are a fast easy way to mark out lines. When used in conjunction with stencils, they are ideal to identify and mark safety or critical areas. Specific words and phrases are available or the alphabet with numbers to make your own.

Available in various sizes  
NO PARKING RESERVED  
NO EXIT PARKING  
NO ENTRY DANGER
